**Subject- Garbha Sanskar to Upanayana Sanskar - Critical study in
the context of child development**

The subject has been selected keeping in mind the scope and mission-vision of Children's Research University. Children's Research University itself believes that work should be done in all branches of education regarding the development and education of children. The entire research is divided into chapters starting with the role and then what is Sanskar?, Necessity or purpose of Sanskars, Importance of Sanskar, Number of Sanskars, Sanskar: Means of upliftment of the people or officers of Sanskar Karma, Traditions of Sanskar Karma, Scientific thought in the context of 'Sanskar Method' and conclusion.

Research on the subject of child development: The tradition of Sanskar, formation or Acharya-Vichar in child development has been accepted in India and around the world. We have a system where guidance is provided at all stages of life through sixteen (16) Sanskars. Starting from the womb to the story, the discussion and analysis of the culture distinguishes this research. It has been explained how these culture are useful in educational, social and all-round development in child development.

The present research discusses the sixteen culture processes and their importance in all-round child development. The research format has been to present the principles through discussion, consideration and analysis. Child rearing and child development get a boost through culture development.

This research has used the descriptive-analytical qualitative research method. This method has the importance of description and interpretation. Through the analysis of the content under this method,

The main purpose of this research is to discuss the sanskars in the Indian tradition on how to use them in modern times. Especially, the immense importance of sanskars starting from Garbha Sanskar to Upanayan has been accepted.

□ In the first chapter, different definitions and explanations of sanskars have been given. Through which the research is revealed. Along with this, the importance of sanskars in life has been shown.

□ In the second chapter, the number of sanskars in different scriptures has been discussed. In the chapter titled Necessity or Purpose of Sanskars, the importance of sanskars for child development, the number of sanskars and the traditions of sanskar karma have been shown.

□ In the third and fourth chapters, there is a discussion on how sanskars become a means of uplifting the people. The views of various scriptures and Upanishads have been cited regarding who are the authorities of sanskar karma.

□ In India, the traditions of sanskar karma have been prevalent since ancient times. Then, scientific thought has been given in the context of 'sanskar method'.

□ In the fifth chapter, rituals and their impact on the child and the family are also discussed. An attempt has also been made to explain the rituals associated with the rituals. Subtle details about Agnihotra are given.
