About University

Children's University, Gandhinagar is worlds only one and unique university that caters to the Unborn child to 18 years of youth. The concept of this unique university was developed by Hon. Prime Minister Shri Narendrabhai Modi when he was a chief minister of Gujarat. A wonderful mantra appeared in his mind to establish this university i.e. 'Every Child Matters'. The vicinity of this mantra resulted in the 'Darshan' of the university. In the words of Hon'ble Shri Narendrabhai Modi: "The child should be brought up with such a warmth and care that he develops physically, mentally, intellectually, emotionally and spiritually healthy human being and has the opportunity of self-realization." In order to bring this mantra and philosophy on a practical background, a system was formed in form of Children's University, Gandhingar Gujarat on July 31, 2009.

At present, the university is working on various projects like 'Tapovan Kendra', 'Shishu Parmarshan Kendra' and Vidyaniketan under the able leadership of the Vice-Chancellor Shri Harshadbhai P. Shah. The university operates holistically in all four areas of education, training, research and extension related to child development, starting from the process of fertilization and the process of invoking and quoting the best offspring; And every child dreams of stepping out of society in the form of an excellent human being.

There are a number of advanced courses, including postgraduate courses in Psychology, Social Work, Dietetics and Nutrition, Gujarati, Sanskrit. Ph.D is also offered in Home Science and other subject.

About the Department

The Department of Home Science is an important unit reflecting the vision-mission of the University and working towards its achievement. The Department of Home Science has been functioning at the University since the year 2018. The Department of Home Science is currently offering M.Sc. in Foods and Nutrition, PG Diploma in Nutrition and Dietetics and Ph.D. in Home Science. The main objective of these courses is to prepare the students as proficient practitioners of diet and nutrition care by providing the best education and research as well as field experiences in the subjects related to diet and nutrition.
