

## 7. 1. 5 Response

- The University is very sensitive for environmental protection and awareness, and it remains concerned with various activities for awareness creation and environment protection. The programs such as tree plantation, Arnyotsav etc. organised on and out of the campus. Use of Bicycles is also popular in our students feternity.
- Vehicles are parked in the parking area of Children's University. But there is a ban on big vehicles from outside. Sometimes students also come with bicycles, which prevent pollution. The internal pathways at the university are connected and direct to each other.
- Pedestrian-friendly routes also benefit the university. There are also internal roads available where needed.
- The use of plastic is banned. Plastic glasses and other essential items have also been banned by the Gujarat Government as before. So that plastic items are not purchased in any different programs. The use of food dishes or bags has been completely stopped.
- landscaping with trees and plants: The beauty and charm of Children's University is due to landscaping with its trees and plants. Trees are planted every year on the campus. The gardener has been kept to take care of the garden very carefully.
- The university's new building is now coming up on the same campus. Therefore, planning a garden is not entirely possible. But flowers and garden trees have been planted on the part where the university's old building is now located.
